Polish Spy Defected to the West Reveals Sensational Facts -- Diplomats
CPYRGHT
~~Are Also Used As Spies~~

Former Polish spy Mihail Golenevski who with his German wife came to the West and who since 1961 has lived in the USA has given US authorities valuable documents concerning Russian espionage against the USA. On Tuesday behind closed doors he gave a special Congress committee more new and completely sensational documents which revealed the names of four US diplomats working in the Warsaw embassy. The diplomats conducted a spy network for Russia with the cooperation of Polish girls. They held responsible positions in the embassies and foreign ministries and Moscow has used their "cooperation" for several years. Golenevski also revealed the fact that 10 American military officers have provided the secret intelligence in Poland with steady information.

Golenevski named a number of secret Communist agents who were fortunate enough to attain responsible positions in the US government. Some of them even work for the intelligence service. One of them is a CIA agent who was sent to Vienna. He was able to transfer 1.2 million US dollars to the Italian party for counter-intelligence. Golenevski also provided the names of 3 scientists working for the interest of Soviet intelligence. There are a great number of such Communist scientists although he does not know their names.

The Soviet NKVD agents succeeded in obtaining positions in many USA agencies. The FBI is the only agency in which there are no Communist agents, but if there are, then he does not know their names.

The special committee which heard Golenevski undertook immediate steps and made arrangements for the personal hearings of 300 people in the diplomatic service.

It was observed that the Warsaw embassy is one of the most important embassies because of its close location to Russia and because through the Red Chinese ambassador in Warsaw negotiations were being conducted to ease the situation of American prisoners in China, although up to now these have been of no avail.

Golenevski blamed the CIA in that it has helped protect diplomats and government officials working for NKVD. He had gone to the embassy in Warsaw five times to ask for permission to come to the USA and to make sensational revelations here, but he was told each time that his presence in Warsaw was more useful to the CIA. Among other things, Golenevski revealed the name of Joseph Farland, [✓]former official at the US embassy in Panama, Edwin Martin, former aide to the foreign-minister on Latin American affairs, and Ralph Dongan, who served in such a position in which he was able to provide the counter-intelligence information on the foreign ministry and the Pentagon.
